

SVdP CARES About Suicide Prevention:

SVdP CARES is a nonprofit organization providing coordinated support to reduce crisis and instability among Veterans and other vulnerable individuals. By addressing known suicide risk factors, such as housing instability, financial stress, and social isolation, SVdP CARES strengthens protective factors that support Veteran well-being and suicide prevention. Services include care navigation, emergency and temporary housing, prevention and diversion assistance, meals, career counseling, and other individualized supports. Programs operate across 22 counties in Florida, with Veteran-specific services available in 24 municipalities in Puerto Rico's CoC PR-502 region. All services emphasize choice, self-determination, and a low-barrier approach.
